Guilherme Dourado

Senior Product Designer

Calgary, AB, Canada · guigadourado@gmail.com · guidourado.com · linkedin.com/in/guilhermedourado

SUMMARY

Senior Product Designer with 14 years designing mobile, web and marketplace products for music and creator platforms. I take ambiguous, technically complex problems from rough requirements to shipped product, and build the design systems, Figma plugins and AI workflows that help design and engineering ship faster. Most recently I led design of BeatStars Projects from the first wireframe to launch, with more than 1,700 projects created in its first three weeks.

EXPERIENCE

Senior Product Designer

Feb 2022 to Present

BeatStars · Calgary, AB · Music marketplace, 10M creators, $400M+ paid out

- Led design of BeatStars Projects as the only designer on a team with a PM and four engineers, from PRD to launch on every plan in September 2026: 1,700+ projects in three weeks, 93% core task completion in Amplitude.
- Turned a contract grade rights PRD into a six step Splits approval flow, validated with an interactive prototype before engineering began building.
- Prototyped directly in the production codebase with Claude Code, and ran design QA that logged 97 issues across 11 areas, 83 resolved before handoff.
- Lead design across web, mobile and embeddable players, including platform overhauls and subscription redesigns.
- Own the Origin design system end to end: 285 tokens shipped as JSON, CSS variables and Tailwind config, components mapped to code with Code Connect, and a GitHub Actions pipeline that ships 1,000+ optimized icons from Figma to an engineering package.
- Built Figma plugins that migrate designs between library versions by similarity and scale, turning weeks of migration work into a day across nearly 500 token mappings.
- Contribute to product strategy and OKR planning; onboarded and mentored newer designers.

User Experience Design Specialist

Nov 2019 to Feb 2022

ília · Brasília, Brazil · Embedded with Santander and Livelo

- Shipped banking and loyalty products across web and mobile within strict compliance and accessibility requirements, working with Santander's design teams in Spain, the UK and the US.

Head of Design

Jun 2017 to Jun 2019

My Mixtapez · Goiânia, Brazil and Atlanta, US · Music streaming, 14M downloads

- Built the UX team from scratch: hiring, research practices and usability testing.
- Led a full redesign across iOS, Android and web for 5.7M active users; in A/B testing, task success rose 42% and time in the player 20%.
- Created the product's first design system, making new concepts 60% faster to take from design to validation; owned brand and live events including SXSW and A3C.

Visual Designer

Jun 2012 to Jun 2017

My Mixtapez · Promoted to Head of Design in 2017

- Designed the My Mixtapez brand and visual language from the ground up, and owned the app's design from early development through major releases.

SKILLS

Product design: interaction design, prototyping, usability testing, research synthesis, design QA · **Systems:** design tokens, component libraries, Figma variables, Code Connect · **Build:** Figma plugins, React and Tailwind prototyping, GitHub Actions, AI workflows with Claude Code and MCP

EDUCATION AND LANGUAGES

B.Tech in Graphic Design, Senac Brasil, 2011 to 2013 · English and Portuguese, both fluent
